Storage case to store insulating gloves

Conform to :
Used for protecting insulating gloves

Use :

Especially designed to protect insulating gloves of all classes 00 to 4 (low voltage to high voltage).

This box ensures to the gloves a mechanical protection against shocks and UV rays.

It can be fixed on a wall, in a substation, or be used as a carrying box and a storage box, for example in a car. The box can be placed in a vertical position.

The translucent cover allows to check the gloves are inside.

In addition, it is recommended to keep on the insulating gloves in their bag.

The ergonomic handle allows to have a quick and easy opening of the box.

In a red colour, the box is more visible.

Characteristics :

- Plastic box, red base and translucent cover
- Ergonomics large opening handle and carrying handle
- Translucent cover treated against UV-rays
- Quick fixing of the gloves with a professional Velcro, which doesn't damage the gloves
- Flask of talc
- Multilingual labels to stick on the cover in the appropriate area ; on these labels are written the maintenance recommendations following the IEC 60903, the insulating gloves standard.
- 3 fixing points, distances of fixing 140 x 260mm
- Global dimensions : 476 x 224 x 101 mm
- Weight (empty with flask of talk) : 0,860 kg
